## Atomic and Molecular Physics

- Recent improvements on the pulsed optically pumped rubidium clock at SIOM *Gongxun Dong, Jianliao Deng, Jinda Lin, Song Zhang, Haixiao Lin, and Yuzhu Wang* 040201
- Velocity-tunable cold Cs atomic beam from a magneto-optical trap *Xueshu Yan, Chenfei Wu, Jiaqiang Huang, Jianwei Zhang, and Lijun Wang* 040202

## Fiber optics and optical communications

- Temperature-insensitive optical Fabry–Perot flow measurement system with partial bend angle *Huijia Yang, Junfeng Jiang, Shuang Wang, Yuheng Pan, Xuezhi Zhang, and Tiegeng Liu* 040601
- Demonstration of a 400 kbps real-time non-line-of-sight laser-based ultraviolet communication system over 500 m *Kun Wang, Chen Gong, Difan Zou, Xianqing Jin, and Zhengyuan Xu* 040602

## Holography

- Auxiliary resonant scanner to increase the scanning capability of coarse integral holographic displays *Jhen-Si Chen, Quinn Smithwick, Jin Li, and Daping Chu* 040901
- Modal analysis of  $1 \times 3$  reflective triangular gratings under normal incidence *Jin Wang, Changhe Zhou, Jianyong Ma, Yonghong Zong, and Wei Jia* 040902
- Development of projection-type optical scheme for computer-generated Fourier hologram recorder *E. Yu. Zlokazov, S. B. Odinokov, N. M. Verenikina, and S. S. Donchenko* 040903

## Imaging systems

- Experimental demonstration of enhanced resolution of a Golay3 sparse-aperture telescope *Zongliang Xie, Haotong Ma, Bo Qi, Ge Ren, Jianliang Shi, Xiaojun He, Yufeng Tan, Li Dong, and Zhipeng Wang* 041101
- Optic flaws detection and location based on a plenoptic camera *Yinsen Luan, Bing Xu, Ping Yang, and Guomao Tang* 041102

## Integrated optics

- Low-crosstalk silicon photonics arrayed waveguide grating *Zhiqun Zhang, Juan Hu, Hua Chen, Fangjiang Li, Lei Zhao, Jinbin Gui, and Qing Fang* 041301

*Contents continued*

## Lasers and laser optics

- Picosecond pulse generation in a mono-layer MoS<sub>2</sub> mode-locked Ytterbium-doped thin disk laser *Jun Lu, Xiao Zou, Chun Li, Wenkai Li, Zhengzheng Liu, Yanqi Liu, and Yuxin Leng* 041401
- 33 W continuous-wave single-frequency green laser by frequency doubling of a single-mode YDFA *Shuzhen Cui, Lei Zhang, Huawei Jiang, and Yan Feng* 041402
- Mode-locked thulium-doped fiber laser based on 0.3 nm diameter single-walled carbon nanotubes at 1.95 μm *Yanping Chen, Jianpang Zhai, Xintong Xu, Ling Li, Jinzhang Wang, Min Zhang, Shuangchen Ruan, and Zikang Tang* 041403

## Optical devices

- High-efficiency LED COB device combined diced V-shaped pattern and remote phosphor *Zongtao Li, Huiyu Wang, Binhai Yu, Xinrui Ding, and Yong Tang* 042301

## Optoelectronics

- Low-loss high-extinction-ratio single-drive push-pull silicon Michelson interferometric modulator *Minjuan Wang, Linjie Zhou, Haike Zhu, Yanyang Zhou, Yiming Zhong, and Jianping Chen* 042501

## Scattering

- Simulation of Brillouin gain properties in a double-clad As<sub>2</sub>Se<sub>3</sub> chalcogenide photonic crystal fiber *Xin Chen, Li Xia, Wei Li, and Chen Li* 042901
- Self-calibrated global rainbow refractometry: a dual-wavelength approach *Xuecheng Wu, Haoyu Jiang, Kailin Cao, Yingchun Wu, Can Li, Gérard Gréhan, Sawitree Saengkaew, and Kefa Cen* 042902

## Thin films

- Temperature coefficient of the refractive index for PbTe film *Lingmao Xu, Hui Zhou, Yanchun He, Kaifeng Zhang, Shenghu Wu, and Yuqing Xiong* 043101

## X-ray optics

- 13.5 nm Schwarzschild microscope with high magnification and high resolution *Shenghao Chen, Xin Wang, Qiushi Huang, Shuang Ma, and Zhanshan Wang* 043401
